

Introduction To Symbolism

“Symbols are not allegories and not signs: they are images of contents which for the most part transcend consciousness. We have still to discover that such contents are real, that they are agents with which it is not only possible but absolutely necessary for us to come to terms. While making this discovery, we shall not fail to understand what dogma is about, what it formulates, and the reason for its existence.” ~ **Carl Jung, Symbols of Transformation**

Introduction To Symbolism

Master Mind Content would like to invite you on a journey of self-discovery. We want to help you unlock the power of your psyche so you can free yourself from the burden of subconscious programs that create chaos and disorder in your life.

The “Psyche” is an ancient Greek word that expresses the three-fold force of life in human beings: Mind, Soul and Spirit. Ancient myths and religious scriptures all speak of this “Holy Trinity” and explain how to expand conscious awareness to attain enlightenment.

If you want to know the secret to life you need to understand what Mind, Soul and Spirit really are!

However, in order to discover the secret to life, you need to lift the veil of exoteric symbolism that hides the Truth. The exoteric symbolism you find in mainstream sources is misleading.

On the flip side, an understanding of esoteric symbolism - the hidden meaning - helps guide you to deeper levels of understanding. The process of self-realisation ultimately brings about transformations which enrich your life experiences.

Master Mind Content explains how symbolism relates to psychology, quantum physics, neuroscience and epigenetics. It is the psychobiological system that drives your behaviour, emotions, instincts, perception, beliefs, and attitudes.

The far-reaching benefits of our symbolism courses and Essential Self-Development Program include developing your personal power to:

- Identify and change destructive patterns of behaviour
- Overcome addictions and bad habits
- Integrate missing fragments of your personality and become whole (Holy)
- Understand the events you are experiencing in life and why
- Release repressed emotions and expand conscious awareness
- Make informed decisions with confidence
- Upgrade subconscious programs with wisdom
- Find inner peace
- Cultivate a richer quality of life
- Attract wealth and abundance

In other words, symbols are a powerful resource you can use as a self-development tool. They enable you to acquire wisdom and give you the power to cultivate a life of success, wealth and happiness.

If you want to take your life to the next level, the Essential Self-Development Program and symbolism courses we offer at Master Mind Content are valuable resources that will expedite your self-improvement process.

A good starting point is our Beginners Guide to Symbolism. This entry-level course provides you with the basic insights of symbolism in relation to the three aspects of consciousness: Mind, Soul and Spirit.

The Holy Trinity.

We hope you join us on this journey.

If you're ready, you can to step through the gateway to a richer quality of life right now!

In the Beginning

Myths and religious scripture reveal timeless wisdom; the secrets to life. However, everything you need to know - the Truth - is concealed in esoteric symbolism.

Esoteric means hidden.

Understanding the hidden meaning of symbolism reveals the Truth. Your Truth!

Let's start "in the beginning" - with God.

Who or what is God?

God is the name given to Universal Intelligence. In Hinduism, God is Brahman. You will also hear this mysterious force called the Supreme Consciousness, Divine Wisdom, Source, True Self, The Truth, the Akashic Records, the Universe, and many more.

In essence, God is the universal intelligence that drives nature. Science calls it the electromagnetic field.

This Supreme Intelligence is stored in the atoms of the Universe; it's in your DNA, the thoughts you think, the emotions you feel and all the forces that binds material reality together.

This intelligent force is everywhere and in everything; omnipresent, omniscient and omnipotent.

Moreover, this Divine Intelligence communicates to us through symbols that appear in dreams, imagination and daily experiences. Your inner consciousness is mirrored in the outer world.

Thought-Provoking Quote

"Certain kinds of symbolism constitute a universal language, because the images and their meanings occur in similar forms - and carry similar power - right across cultures and centuries. The symbols that go to make up this language are the natural expression of inner psychological forces." ~ **David Fontana, The Secret Language of Symbols**

In other words, when you understand the meaning of esoteric symbolism, you can communicate with your higher intelligence. Your guide. Your Truth.

To understand the esoteric meaning of symbolism, it is necessary to collect the pieces of the jigsaw from multiple sources/cultures. To save you years of time and effort, Master Mind Content has already done this for you!

You will find examples of how we interpret symbols on our blog. Here are just a few:

[The Symbolic Meaning of Dogs](#)

[The Symbolic Meaning of Stags and Deer](#)

[The Symbolic Meaning of the Number 21](#)

When you read our content, you will notice we relate symbolism with the discoveries in frontier sciences in modern times; mostly psychology, epigenetics, and quantum physics.

For example, reincarnation, resurrection, death and rebirth is the equivalent of the Law of Thermodynamics; energy does not die, it transmutes. It is reborn, resurrected, reincarnated. All you need to do is learn how to be “reborn”.

Ever wondered what the second coming of Christ really means?

Thought-Provoking Quote

“My brain is only a receiver, in the Universe there is a core from which we obtain knowledge, strength and inspiration. I have not penetrated into the secrets of this core, but I know that it exists.”

~ **Nikola Tesla**

To improve your quality of life, you have to identify with your True Self. Your True “Divine” Nature. Jesus Christ represents God in Man; Pure Consciousness and Supreme Wisdom programmed in your subconscious.

The gods in myth are symbolic references that teach us the qualities of human nature; both good and bad.

To improve your quality of life, all you really need is to access universal wisdom. Symbols are guides that enable you to access your True Self and integrate your True Nature.

Why Should You Learn The Esoteric Meaning of Symbols?

There are two versions given for the meaning of symbols; **esoteric** interpretations and **exoteric** interpretations.

Esoteric means ‘that which is hidden; the secret meaning’.

Exoteric interpretations, on the other hand, are the meanings offered by established authorities; religions, academia, cults and societies such as the Free Masonic movement.

The Merriam-Webster dictionary defines exoteric symbolism as “suitable to be imparted to the public” and “belonging to the outer or less initiate circle.”

The esoteric approach lifts the veil of illusion and reveals the timeless wisdom of Universal Nature. You discover your True Nature and dispel the falsehoods you are programmed with.

Thought-Provoking Quote

To understand literally the symbols and allegories of Oriental Books as to ante-historical matters, is wilfully to close our eyes against the Light. To translate the symbols into the trivial and commonplace, is the blundering of mediocrity.” ~ **Albert Pike, Morals and Dogma**

Act upon the information you receive from your higher conscious nature that drives you towards thriving and you will cultivate inner peace, outer harmony and a richer quality of life.

Whilst exoteric interpretations are not wrong, they only offer a glimpse of the Truth. They can therefore be misleading. When you only have a few pieces of the jigsaw, you don't see the full picture. Exoteric symbolism is designed to keep you "in the dark"; in ignorance.

What could be more important than understanding the workings of the conscious mind, the subconscious mind and the Supreme Mind?

The Holy Trinity!

Just saying.

When you understand how the three aspects of Mind works, you will improve your relationships, your career, your financial situation, find inner peace and emotional freedom, and enjoy a greater sense of feeling, happiness and fulfilment - plus much more.

If you want to avoid the confusion you experience when you reach a crossroads in your life, symbols show you which way to go.

This notion may appear fanciful and unbelievable but I can assure you that esoteric symbolism is not mystical hoodoo. On the contrary, **ancient wisdom guides you to self-realisation and ultimately "enlightenment"**.

Ever wondered why the saints have halos? It's the symbol of the sun; the illuminated mind.

Illumination is the 'Elixir of Life'.

The gold and silver keys St. Peter is clutching in the image on the right is symbolism too...

...gold is the sun...silver is the moon.

Knowing the difference between the sun and moon give you the keys that open doorways of opportunity, success, wealth, health and wholeness.

The Secrets of Symbols

In his book “The Power of the Subconscious Mind” psychoanalyst, Dr Joseph Murphy explains everything that manifests in your life is a result of how you put your thoughts into action.

Thought-Provoking Quote

“Everything that has happened to you happened because of thoughts impressed on your subconscious mind through belief. If you have communicated wrong or distorted concepts to your subconscious mind, it is of the most urgent importance to correct them.” ~ **Dr Joseph Murphy, The Power of Your Subconscious Mind**

It's common knowledge today that subconscious programs lie at the root of your emotional drives, instincts, habits and cravings etc. It's also a well-established fact that you have to update your subconscious programs by how you think.

However, what most “self-development” practitioners don't know is what the right program is for you at that given moment in your life. The only person that can know that is you.

And the answer - Your Truth - lies in your unconscious. The Supreme Mind.

Ancient myths teach us the same thing as modern psychologists. Princes replace their fathers as kings. Princes represent awakening consciousness and kings represent fully developed knowledge, beliefs, attitudes and perceptions. These elements are what you base your decisions on.

But what happens when your knowledge, beliefs, attitudes and perceptions are wrong or cause limitations? They prevent you from getting to where you want to be.

In Freudian psychology, the ego is the decision-maker. But in order for the ego to make the right decisions, you need to program your subconscious with wisdom.

In neo-Jungian psychology, the seat of consciousness is the self-ego axis. Ego is the outer-facing consciousness which handles the physical world. The self is the introspective self.

I can't stress how important it is to know this for the process of self-development.

Thought-Provoking Quote

“Note that we have two bodies of very great perfection full of Mercury: Out of these extract thy Mercury, and of that thou shalt make the Medicine, called by some Quintessence, which is a Vertue or Power that is imperishable, permanent, and perpetually victorious, nay it is a clear Light, which sheds true goodness into every Soul that hath once tasted of it. It is the knot and link of all the Elements, which it contains in itself, as being also the Spirit which nourishes all things, and by the assistance whereof Nature works in the Universe. It is the force, the beginning and end of the whole work, and to lay all open to thee in a word, know that the Quintessence and the hidden things of our Stone is nothing else than our viscious, celestial and glorious Soul drawn by our Magistry of its Mind, which engenders itself, and that it is not possible for is to make that water by Art.” ~ **Synesius, The True Book of the Learned Greek Abbot**

The timeless wisdom of mankind is hidden in religious scriptures and ancient myths. The **secrets are stored in the pantheons of mythological gods that represent archetypes.**

Archetypes possess all of the positive and negative qualities of mankind. Herein lies the key to self-development.

In many circumstances, you will have positive qualities that enable the ego to perform the function you need in any given moment. Other times you are urged by emotional drives that you cannot control.

When you find yourself “caught in two minds” which voice do you listen to? The Spirit or The Soul?

It's common knowledge among psychoanalysts that your subconscious mind feeds the conscious mind information based on your previous experiences. This is why we have a habitual mind.

For many people, programs in the subconscious include limiting beliefs, false Truths, fear, negative thinking and all the other in-built content that creates problems in your life or prevents you from achieving your life goals.

I'll tell you this now. Subconscious programs that control your actions are symbolised by the Devil. Or demons, dragons, monsters, malevolent kings, evil sorcerers, trolls etc.

Malevolent figures in mythology reflect the dark nature of mankind that are destructive. Benevolent gods are constructive. It is often the case that the constructive nature of an individual's personality is not given life.

The works of Carl Jung help us to distinguish archetypal energies. The eminent psychoanalyst said that integrating unconscious energies - Universal Wisdom - can help you to heal, evolve, grow and thrive.

Thought-Provoking Quote

“Man becomes whole, integrated, calm, fertile, and happy when (and only when) the process of individuation is complete, when the conscious and the unconscious have learned to live at peace and to complement one another.” ~ **Carl G Jung, Man and His Symbols**

So if the ultimate goal is to reprogram your subconscious mind wouldn't it be useful to have a tool that reveals the inner wisdom in your unconscious?

Knowledge of the archetypes enables you to identify your strengths and weaknesses. You can determine whether your positive qualities outweigh your negative qualities and identify whether you need to deflate or develop your ego.

There are clues to this secret knowledge in symbolism. For example, Micheal Angelo's famous painting on the the ceiling of the Sistine chapel which shows god touching the finger of the first man, Adam.

Can you see how god is surrounded by 12 figures. And the shell they are in looks like a brain.

Understanding the secret of symbols is arguably the most powerful tool available in any personal development program.

Symbols reveal which programs are stored in your subconscious and enable you to identify why you are falling short of your life goals.

It's worth noting at this point that **the unconscious and the subconscious should be classified as two different aspects of the mind**. It helps you to understand whether your thoughts help you to survive or to help you thrive.

Understanding the three aspects of Mind (the Trinity) is key to self-development.

We explain the three aspects of Mind in the **Beginner's Guide To Symbolism** by using the Vesica Pisces and the symbolism of Mind, Soul and Spirit together with Sun, Earth and Moon, and Heaven, Earth and Hell.

Until you know the difference between subconscious programs and unconscious content your life will not improve quickly. Subconscious programs make it difficult for you to step outside of your comfort zone. As a result, your experience in life is limited and will continue to get what you already have.

The Unconscious Is a Wealth of Riches

Because ancient wisdom in mythology and religious scripture is on the whole misunderstood, people have discarded religion and fail to recognise why the gods in myth were created in the first place.

In ancient times, gods were associated with the forces of nature. Given humans also belong to nature, it is a gross mistake to ignore the secret wisdom hidden in world mythologies as mystical hoodoo.

It is our mission to explain how ancient mythology can be used as a self-development tool. Ancient myth explains everything modern scientists are discovering today; but the beauty is, the stories and images that myth conjure help you to understand and remember the science.

With your help, we can promulgate this critical knowledge and contribute more to cultivating a better world in which people can find inner peace, live in harmony and enjoy a richer quality of life.

Our symbolism courses enable you to venture into the deeper meanings of ancient mystery schools and learn how to use symbols and numbers to your advantage.

The truth is, you already have the all the answers you need at your disposal. You just need to become consciously aware they are there. Symbols are everywhere and help guide you to your Higher Self - your True Nature.

Thought-Provoking Quote

“The analogies between ancient myths and the stories that appear in the dreams of modern patients are neither trivial nor accidental. They exist because the unconscious mind of modern man preserves the symbol-making capacity that once found expression in the beliefs and rituals of the primitive. And that capacity still plays a role of vital psychic importance. In more ways than we realize, we are dependent on the messages that are carried by such symbols, and both our attitudes and our behavior are profoundly influenced by them.” ~ **Joseph L. Henderson, Man and His Symbols**

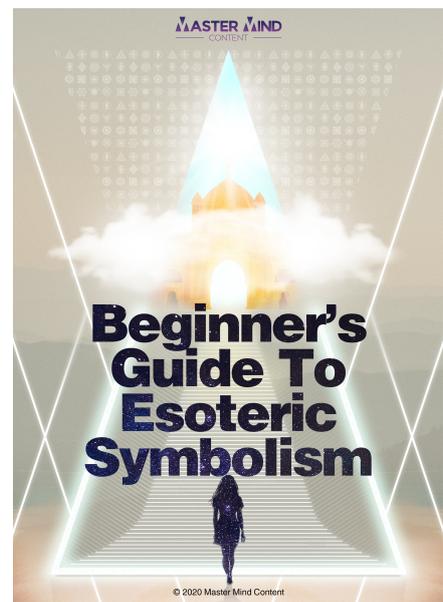

How To Use Symbols For Self-Discovery

The first step to self-development is to sign up for the [Beginner's Guide To Esoteric Symbolism](#).

This 77-page course explains what Mind, Soul and Spirit are and how to distinguish one from the other.

You also learn what Sun and Moon symbolism represents together with serpents and Xs.

The beginner's course also explains how you can decode ancient wisdom by yourself so you can further your studies.

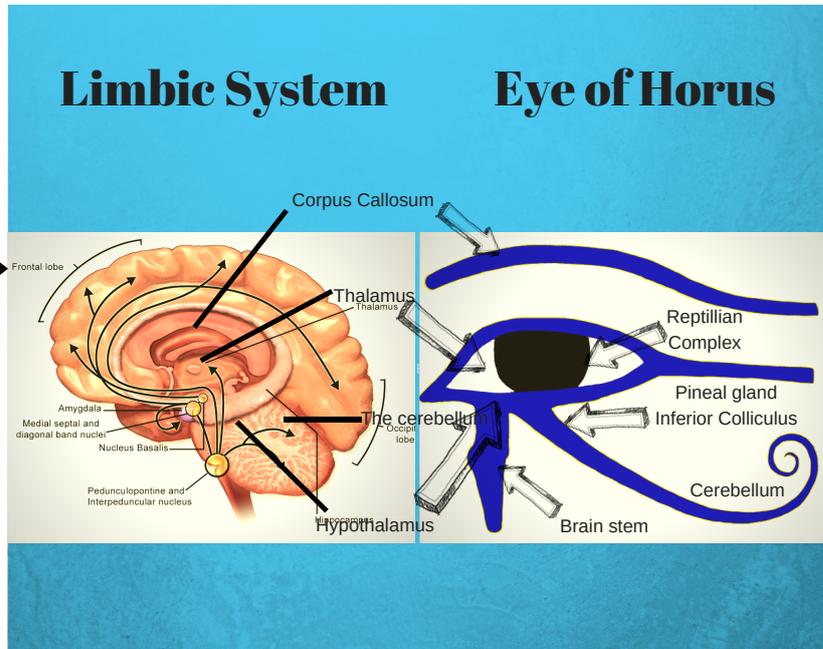

In addition, I explain the symbolic meaning of the Egyptian creation story in which Osiris is murdered and dismembered by his brother Set. This is a prime example of how the subconscious is programmed and a good example of how ancient mythology can help you remember modern science.

I also describe the meaning of 22 other symbols and reveal the deeper meaning behind the Eye of Horus.

Here's a clue. →

Once you understand how the mind-body connection works, how to transform energy and the three aspects of mind, you will be able to use symbolism as an effective self-development tool.

It's actually quite simple.

When you see synchronicity in symbols or events, it's your unconscious content trying to make itself known to the conscious mind - the self-ego axis. All you have to do is know how to interpret the symbolic language.

Thought-Provoking Quote

“What makes alchemy so valuable for psychotherapy is that its images concretize the experiences of transformation that one undergoes in psychotherapy. Taken as a whole, alchemy provides a kind of anatomy of individuation. Its images will be most meaningful, of course, to those who have had a personal experience of the unconscious.” ~ **Edward Edinger, Anatomy of the Psyche**

Our symbolism courses teach you how to interpret the language of your unconscious - and, therefore, have “a personal experience of the unconscious”.

The good news is, we have done all the leg work and translated symbolism for you! It took us 7 years - so will save a fair amount of time. The Truth is that the answers you need are in you. The symbols merely guide you to self-realisation.

All our symbolism courses provide you with insightful and comprehensive explanations of esoteric symbolism. We reveal our working out to give you more knowledge, show you how to decode esoteric symbolism for yourself and to give you the confidence that our interpretation of esoteric wisdom is correct.

Our Essential Self-Development Program also enables you to explore your unconscious and your subconscious. More importantly, we show you how to integrate your inner wisdom into the subconscious using a selection of 18 tools - you get to choose which tools work best for you.

You also get access to our VIP Members Area which we update with exclusive content every month. Here you will find supplementary reading material which offers even deeper insights to symbols and science featured in the symbolism guides.

Our full length courses, take you even deeper into specific symbolic systems and provide you with more powerful tools that are invaluable for self-development.

The **Numbers Symbolism** guide explains the meaning of numbers 0-22 (and 33 as a bonus), what to do when you see a synchronicity of numbers and which other symbols or gods (archetypes) are connected to each number.

The **Archetypes in Greek Mythology** course (coming soon) provides detailed insights of how to identify specific archetypes in your personality. You will find both positive and negative qualities.

We also reveal which god of the Greek pantheon represents each of the archetypes. Using mythology gives you a visual-storytelling framework which makes it easier to remember the qualities of the archetypes. We also provide an at-a-glance reference table you can use as a learning tool.

| | | | |
|---|---|---|--|
|  | <p>Gods Zeus</p> <p>Positive Qualities (Power) drive, ambitious, fertile, strong-willed, good leader, authoritative, wise, balanced, confident, stable, centred, self-sufficient, self-assured, illuminated, accommodating, intuitive, self-control, self-discipline, self-sufficient, mental strength, emotional intelligence.</p> | <p>Equivalent King, Father, I am I</p> <p>Negative Qualities Chaotic, indecisive, irresponsible, unreliable, ruthless, demanding, exploitative, unreasonable, weak, rigidity, narcissistic, sensitive to criticism, controlling, sense of entitlement, insecure, emotionally reserved, lack of discipline, arrogance, withdrawn, unsympathetic, elitist views, inflated ego, paranoid, fear of impotence.</p> | <p>Tarot Emperor</p> <p>Archetypes as Energies The Ruler is the decision maker of the self-ego axis (I am I), the balancing influence that enables you to weigh up your choices, overcome your emotions/programs. When underdeveloped, you bow to the whims of the ego, lack willpower or assertiveness and have low self-esteem. You are self-indulgent, lack strong ethics, manipulate others and can appear withdrawn. Life is full of chaotic experiences.</p> |
|  | <p>Gods Hera, Hercules</p> <p>Positive Qualities Commitment, loyalty, dedication, devotion, superior qualities, brave, competent, bonding, faithful, self-acceptance, powerful, approving, aware of the unity of life, self-assured, balance, everything in moderation, transformative power.</p> | <p>Equivalent Rescuer, knight, dragon-slayer, Devouring Mother, ego</p> <p>Negative Qualities Fearful, lack of self-love, self-abandonment, sadness, resentful, jealous, hostile, conceited, vulnerable, arrogant, vindictive, shrew, rage, vengeful, barriers, struggle to overcome attachments, difficulty letting go.</p> | <p>Tarot Temperance / Death</p> <p>Archetypes as Energies The objective of your Hero energy is to make your life worthwhile, to find a purpose, evolve and establish yourself in the world. The challenge for the hero is self-mastery, to break free from the grip of the "devouring mother" (self-destructive behaviours) and cultivate your True Nature. This aspect of you nature is often faced with difficulties you need to overcome but must remain devoted and brave to reach your goals.</p> |

The **Tarot Symbolism** (coming next year) is ideal for individuals that have an interest in learning tarot, or want to extend your existing knowledge. We draw on our knowledge of the archetypes to offer you information you won't find anywhere else (that we know of).

Moving forward we also intend to publish symbolism courses detailing other well-known systems such as the Kabbalah Tree of Life, Alchemy and Astrology together with a series of books and videos.

Esoteric symbolism helps you to discover the best version of yourself and cultivate peace in your inner world. Your inner world is reflected into your outer world.

When you first become consciously aware of symbols and numbers, you will probably notice the same symbols keep appearing. When this happens, pay attention - your Supreme Mind is trying to give you a message that can help you solve a problem or overcome a weakness in your character armour.

Your higher conscious, of which you are mostly "unconscious", wants to be given life in conscious awareness. Doing so enables you to develop on a personal level.

Whatever information comes to you is not by accident or a coincidence. Everyday is an opportunity to learn something about yourself. The more you learn about yourself, the more whole and fertile you become.

Furthermore, you will recognise your mistakes in the actions of mythological heroes and gods. When you examine ancient myth with an understanding of the secret wisdom hidden in the symbolism, the answers you are searching for come to light.

The keys that unlock the Truth are the esoteric symbols you find everywhere.

Thought-Provoking Quote

“The unconscious is a marvellous universe of unseen energies, forces, forms of intelligence - even distinct personalities - that live within us. It is a much larger realm than most of us realise, one that has a complete life of its own running parallel to the ordinary life we live day to day. The unconscious is the secret source of much of our thought, feeling, and behaviour. It influences us in ways that are more powerful because unsuspected.” ~ **Robert Johnson, Inner Work**

Symbolism is the language of the Universal Intelligence. You communicate with it using your conscious mind. When you are consciously aware of the energies coming forward, you are able to upgrade subconscious programs that create conflict, suffering and self-sabotage.

To further your understanding and apply the wisdom of symbols on a practical level, we have also developed a Self Improvement program.

The helps you to understand the psychobiological system in more depth and teaches you how to transform energy to upgrade your subconscious.

We have 18 easy-to-use tools to share with you together with 1-2-1 sessions with our healers.

We will also teach you some useful philosophies that can be used to help resolve whatever issues you are experiencing and reach your life goals.
